**Poland** announced that four (4) new coronavirus cases have been diagnosed on 06 March 2020, following the first case diagnosed on 03 March 2020 in Zielona Gorabut officially announced only late 04 March 2020. The Polish Health Minister Łukasz Szumowski said that the first case was that of a man travelling by bus back from Germany. Among the four new confirmed cases, two have returned from Italy and were hospitalized in the city of Szczecin. One was travelling with the first patient and was recovering in Ostróda. The last one became infected most probably in the UK, and is undergoing treatment in a hospital in Wrocław, a city in Poland's southwest.

In **Estonia**, the two latest cases of confirmed infection brought the total number to 10 confirmed infection cases on 07 March 2020. Two special ambulance crews are operating in Estonia's two largest cities, Tallinn and Tartu, to conduct tests in suspected cases at people's homes. Public points of entry into the country also have three-strong ambulance teams ready to take suspected cases to hospital.

**Latvia** included the whole of Italy in its list of coronavirus affected zones after the second case of confirmed infection was announced.
